

Announcing the Utah State SkillsUSA CNC Machining Contest- Sign up today!

Students and educators- join us for Utah's largest CNC Machining Contest! Showcase your skills and creativity!

Automated Manufacturing Technology (March 21, 2025)	CNC 2 – Axis Turning Programmer (March 21, 2025)	CNC 3 – Axis Milling Programmer (March 28, 2025)	CNC Programmer (March 28, 2025)
--	---	---	------------------------------------

Come and show everyone what you have worked so hard to achieve and win some amazing prizes for being the best in state!

Students have been focused on Blueprint reading, GD&T, Solid modeling, CAM programming, G-Code editing, machine set-up and more. Come put those skills to the test and show everyone what you've got!

This year, The Northern Utah Chapter of the National Tooling and Machining Association (NUNTMA) is fully sponsoring the contest on the technical side, so plenty of expertise, help, and exposure to contestants is available.

Judges will come from real local machine shops. As part of the contest, you will have the amazing opportunity to interview at some of the best machine shops in the state. This contest will give you exposure to potential future employers, and in many cases, they make hires while students are still in school.

We will have High School (Secondary) and College divisions (post-secondary), so everyone is welcome to compete.

REGISTER HERE: www.skillsusa-register.org

Technical information about rules, tools, and other important competition information can be found at machineutah.org. You must be registered as a Skills USA member by February 15, 2025.
